I am an Educational Psychologist. That means I work with children, families and schools. I try to find out what people are good at as well as what they might need some help with. I use this information to help people learn and think in different ways.

## What to expect if you meet me

I might visit you at school or somewhere else you are comfortable to find out what you like and dislike about school. We might play some games together or complete some paper activities. We might also do some drawing or writing together.

- Being open, fair and honest
